

MTB EVENT

TEAM EQUIPMENT

The MTB Event will consist of a five (5)-member assault team.
Mandatory Individual Protective Equipment to be used
throughout the event:

Eye Protection, Ear Protection, Body Armor, Safety Helmet,
Ankle-High Operational Boots, and Operational BTU Pants.

TEAM EQUIPMENT (CONTINUED)

All five (5) team members will report to the LOADING/UNLOADING area for a safety inspection and be equipped as follows:

Each assault team member will utilize a Mountain Bike (No E-Bikes Allowed).

Each assault team member will utilize a semi-automatic handgun with ten (10) rounds of frangible ammunition in one (1) magazine.

EVENT WALKTHROUGH

The entire team will mount their MTBs at the start position. On the command "GO," the entire team will ride along the marked path.

Once the team has completed the riding portion of the event, they will dismount and park their MTBs in the marked parking bays.

Once the MTBs have been parked, assaulters may proceed along the marked path to their individual Shooting Boxes at AFP.

EVENT WALKTHROUGH (CONTINUED)

Once at AFP, each assaulter will move into their designated Shooting Box.

 **Note:** A handgun must not be drawn until the assaulter reaches a stationary position within their designated Shooting Box.

Once stationary, Assaulter may draw their handguns, cock them, and engage the five (5) targets in their respective lanes.

 **Note:** A target must fall over to be considered a hit; however, it does not need to fall off the stand. All targets must be engaged from a STANDING position.

EVENT WALKTHROUGH (CONTINUED)

Once Assaulter have engaged their targets at AFP or have run out of ammunition, they must de-cock (if hammer-fired), engage the safety (if applicable), and securely holster their handguns.

Assaulter may then individually proceed back to the bicycle parking bay area.

Once an assaulter has reached the MTB parking bay area, they must remove their own MTB from the parking bay, lift it off the ground, and carry it to the finish position.

Note: From this point to the finish position, no part of the MTB may touch the ground. Any such action will result in a procedural penalty.

MTB EVENT:

Once all members and equipment have crossed the finish position, the timer will stop.

**Note:**

- Teams must complete the MTB event within the cutoff time of (5 minutes).
- Breaking the 180-degree plane, violating the laser safety rule.
- Early weapon presentation/draw
- Any other inappropriate weapon handling, or dropping or losing control of any weapon, whether loaded or unloaded, will constitute a major safety violation.

No weapon may be handled or manipulated by the pistol grip or trigger group outside of the shooting box.

MTB EVENT:

If any member experiences malfunctions or stoppages with a weapon system, that member must attempt to clear the stoppage or malfunction and continue the course of fire. If a major malfunction or stoppage occurs that prevents the weapon from firing or being placed in a safe condition, the weapon must be safely grounded (muzzle pointing down range) at the shooting position, and the nearest judge should be informed of the malfunctioning weapon.

It is at the member's discretion to either work through continuous malfunctions or stoppages and continue the course of fire, or place the weapon in a safe condition, muzzle down range, and move on. If the judge determines that the stoppage or malfunction was caused by the member and they did not continue to work through the issue, the remaining targets will be marked as misses. Only if the judge determines that the malfunction was not caused by the member will the remaining targets be counted as hits.

MTB EVENT:

If any member experiences a major malfunction or breakage with their MTB (provided by the UAE SWAT Challenge) while riding, which prevents the MTB from moving forward, the nearest judge must be informed of the malfunctioning MTB. It is at the member's discretion to either work through the malfunction or breakage and continue the course or place the MTB down and retrieve one of the backup MTBs stationed along the riding course.

If a member decided to move on from the malfunctioning MTB to a backup MTB, the judge will start a timer from the moment the member leaves the downed MTB and mounts the backup MTB. Once the member has mounted the backup MTB, the judge will stop the timer. This time will be deducted from the team's overall time once the member has successfully completed the entire event.

Procedural Penalties = 10 Seconds

Leaving behind any piece of equipment other than a firearm when dropped.

MTB is not properly placed in the parking bay.

MTB falling over while not mounted.

Dropping of an MTB after being lifted from the ground.

Safety Violation = 30 Seconds

Intentional tossing of equipment (MTB) to further a team's advance.

Failing to retrieve a dropped weapon.

Engaging targets outside of the designated Shooting Box (30 seconds per target penalty).

Picking up a dropped weapon without notifying a judge.

Handling any handgun by the pistol grip or trigger group while holstered.

Major Safety Violation = 2:30 minutes

Breaking the 180-degree plane while handling a firearm.

Violation of the laser safety rule.

Early weapon presentation, draw, or unslinging outside of the designated shooting lane.

Any weapon handling deemed inappropriate.

Dropping or losing control of any firearm, whether loaded or unloaded.

Not following the marked path of the event.

Course Completion Failure = DNF (Did Not Finish)

Judge deems a member's actions unsafe to continue.

Member(s) unable to complete the event.

Team surpasses the five (5) minute cutoff time.

Target Scoring Penalties

Missed Handgun Target = 30 Seconds.

ROUTE MAP

- Location: Dubai Police Mountain Bike Track, Al Ruwayyah, Dubai, UAE
- Track Distance: 1.35 km - 0.83 miles
- Track Rating: Grade 2 (Easy)
- Specifications: The track is mostly flat with some gentle hills, featuring a smooth surface with easily avoidable obstacles such as rocks and potholes.
- There will be spare mountain bikes available along the track in case of a bike malfunction.

AFP – Assault Firing Position.
